With a proven experience of 20 man years and an international exposure catering to varied customers and requirements in various geographies ExcelAsia has been rendering services for the Architectural Design and Construction documents using 5D BIM Technology for Architecture, Engineering and Construction industry.

ExcelAsia offers a full range of architectural services, taking into consideration both the critical factors of quality-control and on time - deliverables, to meet the international industry standards. ExcelAsia has rich and varied experienced technical professionals with expertise in design conversions to complex design development and construction documentation for large corporate buildings, leisure, hospitality and critical facilities including historic conservation.

ExcelAsia also specializes in Technical Design Evaluations, Code Compliance Analysis, Project & CADD Standardization Processes, Specifications, Writing and Building Information Modeling System (BIMS). Our team of Architects and Engineers strive to deliver punctual and high quality solutions, translating clients' business requirements and objectives into built environment.

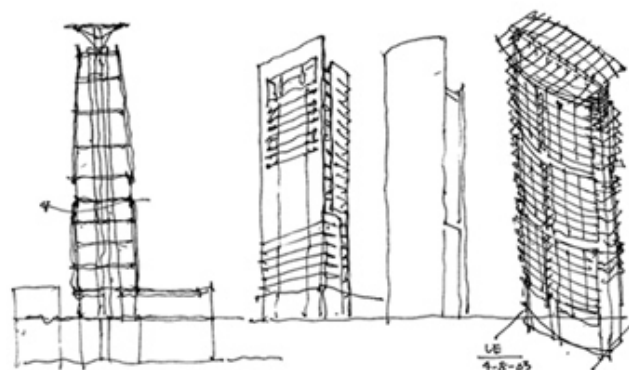

ExcelAsia is in essence an extension of its clients' design studios. The efficiency of its virtual project management makes us an integral business collaborator for our clients.

Virtual Dedicated Team

- A thorough requirement analysis of our clients' projects help us to set up a dedicated team of qualified personnel suited for the client.
- The team is headed by a Project Manager who is the principal coordinator between the Client and team and will be responsible to take the instructions from the client and transfer the same to the team and effectuate quality deliverables.

Reporting Process

- Time schedule and estimate is given at the start of project and instructions transferred to team by Project Manager.
- Progress on project reported on a daily basis with updates maintained through e-mail and phone conversation using VOIP & Skype.

ARCHITECTURAL DESIGN AND CONSTRUCTION SOLUTIONS

Web enabled Project Collaboration

- Progress drawings transferred to client periodically for review.
- The clients stay in control of their project and manages the design development process remotely by giving regular inputs to the team. At the end of this process the final deliverables are sent to the client.
- Activity and time log is maintained accurately. We use BUZZSAW for the project Management

On-Site Personnel

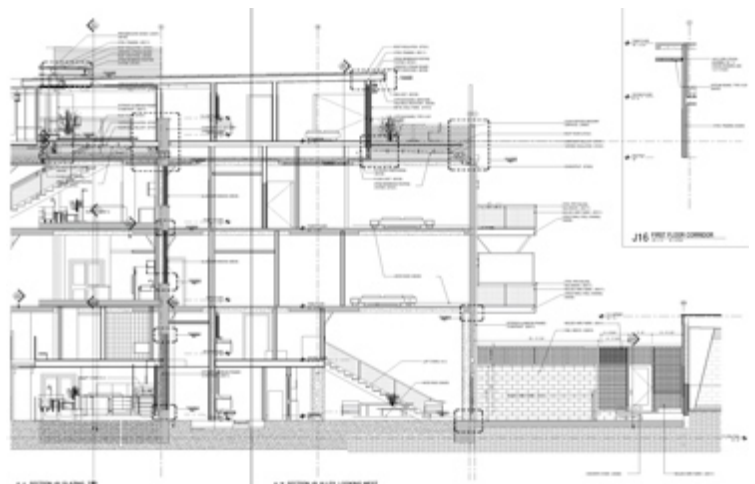

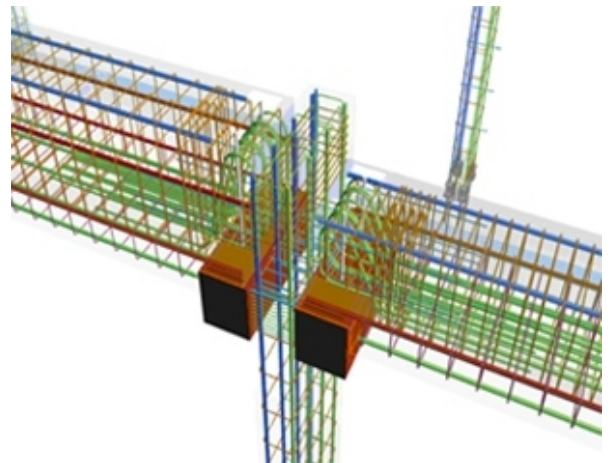

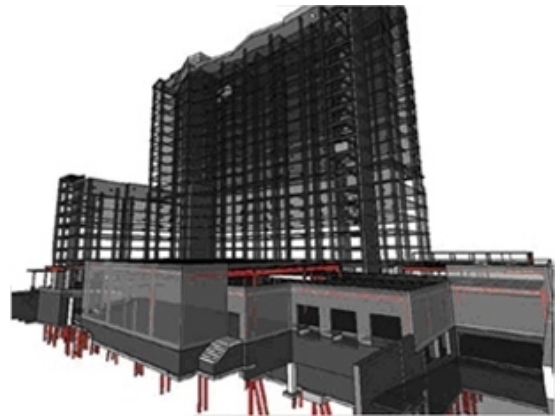

- Project Managers from ExcelAsia are periodically sent for visits to client's office to get hands-on experience.
- They understand client's methodologies and assist remote project management.

ExcelAsia IT Consulting. provides specialized services for the Architecture, Engineering and Construction industries the world over. Our aim is to work as an extended office by providing professional computer aided design (CAD) services to architects, building services contractors, consultant engineers, civil and structural engineers and consultants, developers and main contractors around the globe.

Our unique position as multi-skilled CAD Support Services organization enables us to meet the client requirements: be it converting paper drawings to digital format, 3D visualization or construction and permit drawings, we aim to deliver low cost, customized solutions to our clients. We provide support to the client's existing in-house team to enable a seamless addition. Our experience ranges from multi-storied complexes, medical centres, factories, high rise apartments, housing developments to detached residential units.

And what's more, we are flexible enough to help with the most complex projects at a short notice, providing the client with a 24/7 operation as and when required in the following spaces:

- BIM Services
- Architecture and Interior Design
- 3D Visualization
- Technical Design Review
- Formulating Specifications
- Cad Systems & Standards Development
- Mechanical Engineering
- Electrical Engineering
- Plumbing
- HVAC
- Structural Engineering
